

PROTECT

The Things You Care About

Made in the USA

2017 Space Technology
Hall of Fame Inductee

The ActivePure® Technology built into each Air Scrubber by Aerus is based on a variation of the technology originally developed for use on the International Space Station and is recognized as the exclusive Certified Space Technology™ in its category.

Air Scrubber

BY AERUS

WITH CERTIFIED SPACE TECHNOLOGY™

Highest Standard Product to PROTECT YOUR FAMILY

CLEAN

Reduce Contaminants

Do you worry about what is being brought into your home? Contaminants from school, daycare or the office follow us home on hands, clothes and shoes and land on our doorknobs, counter-tops and floors. Air Scrubber by Aerus contains ActivePure® Technology, proven to destroy up to 99% of all surface contaminants. Additionally, this breakthrough technology scrubs, purifies and cleans the air you breathe by reducing approximately 90% of airborne contaminants.

DEODORIZE

Banish Lingering Odors

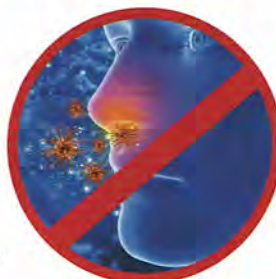

Whether burnt dinner, a family member that smokes or a pet that's just come in from the rain, there's not much you can do to prevent some of life's odors. But now there's something you can do about them. Working through your heating and air conditioning unit, the Air Scrubber by Aerus® is a unique photocatalytic device that will significantly reduce dust, pet dander and odors in your home. You will be able to reduce common smells such as pet odor, cigarette smoke, paint fumes, mold smells and of course the occasional burnt food odor.

PURIFY

Reduce Irritating Particles

Lack of sleep, sneezing, itchy, watery eyes...it's allergy season. Dust, mold, pollen or many of the other pollutants can cause irritation and allergy symptoms. These contaminants can be reduced with the Air Scrubber by Aerus®. ActivePure® Technology uses specialized light waves along with a proprietary catalytic process that creates scrubbing molecules of oxygen and hydrogen which purify your air and reduce irritating particles that can irritate allergy symptoms.

PROTECT

Extend the Life of Your HVAC System

Air Scrubber by Aerus® extends the life of your existing heating and air conditioning system by trapping dirt, dust and other debris before it enters through the filter, damaging the coils and blower that keep your system running effectively. A protected HVAC system can last longer, save you money on your utility bill and reduce the need for expensive service calls.

QUICK FACTS:

- *Designed to help reduce indoor air quality risks known as Sick Building Syndrome*
- *Attaches easily to your heating & cooling system*
- *Uses proprietary light waves along with a specialized catalytic process to keep your home cleaner 24/7*
- *Requires only 18 watts of electricity*
- *Complies with all Federal EPA, FDA & OSHA regulations including the California Air Resource Board Regulations*
- *Proven effective in the International Space Station, Liberty Bell, Ground Zero Museum, Major League Baseball facilities, hospitals, schools, homes and international hotel brands*
- *CARB Certified (ozone free)*
- *Our technology is designed, engineered and produced in the U.S.A.*

Certified Space Technology to PROTECT YOUR HOME

What is Certified Space Technology?

Products and services that display the Space Certification Seal are guaranteed to have originated from technologies that came from space exploration.

What Does This Mean For You?

Air Scrubber by Aerus® purification products use ActivePure®, a variation of technology originally developed in cooperation with NASA to create a safe atmosphere for astronauts on the International Space Station. This technology is now available to help protect you, your family, and your home from dust, germs, odors, pet dander, viruses and more.

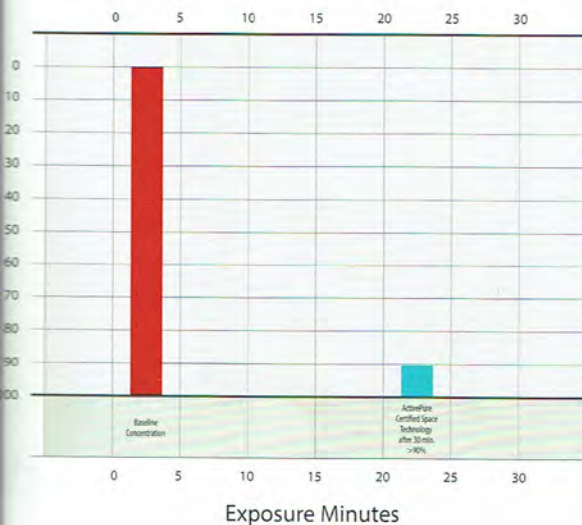

Certified Space Technology logo is licensed to Aerus by the Space Foundation for use of Air Scrubber by Aerus® purification products. The Space Foundation recognizes products whose origins come directly from technology or resources derived from the space programs

ActivePure® Technology to PROTECT YOUR ENVIRONMENT

Scientifically Proven to Clean and Purify

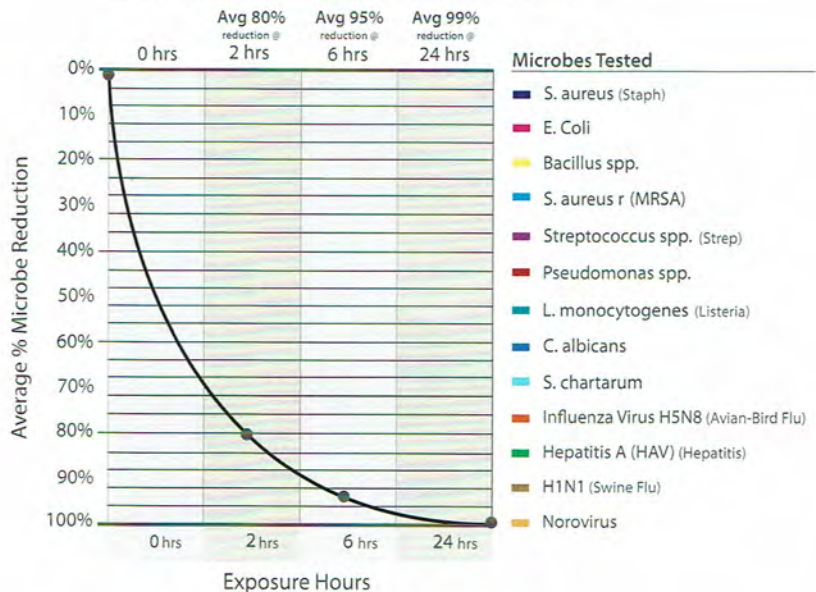

Reduction of Airborne Contaminants

ActivePure Technology testing conducted by University of Cincinnati

Reduction of Surface Contaminants

ActivePure® (RCI) Technology 24 hour testings conducted by Kansas State University

ActivePure® Technology has been studied in controlled university testing for reduction of particulates in the air and contaminants on surfaces. Help protect your home and family against dust, allergens, mildew, smoke, odors, and odor-causing bacteria easily and conveniently with ActivePure® Technology.
